MEDIA RELEASE

LASERBOND Tendering Technology Package for Malaysia

The Tanjung Group of Malaysia, a key service provider to the oil and gas industry, has submitted a Letter of Intent and Request for Quotation to LaserBond (ASX:LBL) for thermal spray and laser cladding equipment worth up to \$2M (\$A).

LaserBond the innovative engineering company which listed in 2007 has proprietary technology and know-how which extends machinery life through reclaiming and improving the functional surfaces utilizing a range of cutting edge technologies including thermal spray and laser cladding.

Tanjung Maintenance Services which is part of the Tanjung Group, provides a range of services to the oil and gas industry including maintenance, repair, calibration and testing of key components and systems on drilling rigs, platforms, refineries and supporting infrastructure.

Tanjung has advised their intent to purchase a technology package including Thermal Spray and Laser Cladding equipment in addition to engineer and operator training and technical support.

Tim McCauley, CEO of LaserBond said “This is an important potential opportunity for LaserBond, and enhances the company’s reputation in a rapidly growing regional market”.
